LEADING IMAGING INFORMATICS

Imaging informatics is a rapidly growing field that uses information technology to improve the efficiency and accuracy of medical imaging services within a healthcare network. Simply put, it allows critical healthcare information to be available anytime and anywhere. The **Society for Imaging Informatics in Medicine (SIIM)** is a global advisor and thought leader in imaging informatics with a focus on enterprise imaging, artificial intelligence, cybersecurity, infrastructure, and standards.

SIIM is a community of #imaginginformaticists who are united by their curiosity and commitment to advancing medical imaging through **INNOVATION, RESEARCH,** and **EDUCATION.** Our members include scientists, developers, vendors, imagingIT experts, and clinicians from around the world. If you share our passion to improve patient care through imaging informatics, **JOIN US!**

| SCIENTISTS | DEVELOPERS | VENDORS | IMAGING IT | CLINICIANS |

WHAT SETS US APART

A trusted and safe place, **where users and vendors come together to accelerate innovation** in enterprise imaging.

The **go-to place for disruptive medical imaging technologies.** Our hackathons and challenges bring together the best and the brightest minds to innovate and collaborate.

Collaboration across all medical imaging specialties including cardiology, dermatology, ophthalmology, pathology, and radiology to harmonize and improve patient care.

Leader in cutting-edge research and strategies in healthcare IT. Our *Journal of Imaging Informatics in Medicine* is the premier resource on the latest advances in imaging informatics.

Career advancement through dynamic learning, conferences and inside access to thought leadership.

A diverse, inclusive and vibrant community **where we know your name!** Connect with peers and luminaries to make meaningful, life-long connections.

SIIM COLLABORATIONS

SIIM Strategy System 2026

OUR PURPOSE

Improving healthcare by advancing imaging informatics in medicine...

We unite clinicians, scientists, developers, imaging IT experts, and industry partners across all imaging specialties around one shared mission:

...turning imaging data into meaningful impact.

KEY PRIORITIES

EDUCATION, TRAINING, AND PROFESSIONAL DEVELOPMENT

RESEARCH

COMMUNITY

STRATEGIC TECHNICAL LEADERSHIP

Core Values guide how SIIM operates and engages our community through these key priorities.

Education will expand with stackable credentials, Annual Meeting, and core programs.

Research focuses on high-impact channels like the CAIMI conference and *Journal of Imaging Informatics In Medicine (JIIM)* to advance science.

Strategic Technical Leadership will intensify SIIM's role in standards like DICOM® and launch the AI in imaging "ground zero" initiative, all amplified by a focus on building deeper community connections.

Community will extend knowledge-sharing internationally through networking, and research opportunities.
